Chief, Supply Division

Staff Study - Relocation of Cargo Branch/TD to

25X1A

1. The attached staff study is presented in response to your verbal request.

2. I urge the approval of the recommendations contained in this study as it is my personal feeling that the improvements, the efficiency to be realized, and the other benefits which at present are rather intangible will fully justify the proposals. I also feel that the recommendation for the manpower survey in approximately six months is appropriate and should enable the Office of Logistics to realize definite manpower savings.
